Product Range

UV-Guard Systems

UV-Guard's own UV disinfection systems are able to provide disinfection for applications with flow rates of up to 500 m³/hr and higher.

UV-Guard is proud that its products have been accredited by the WaterMark Certification Scheme, a requirement documented within The Plumbing and Drainage Code Australia, making our systems food grade compliant. UV-Guard offers the best value for money and price/performance UV systems available in the Australian market.

UV-Guard Spare Parts

We supply an extensive range of consumables and replacement parts to suit all brands of UV systems including Trojan, Wedeco, Atlantic, Heraeus, Hanovia, UV Pure, UVTA, Sterilight, Radfire, Davey, Steriflo, UViFLO, Aquafides, Katadyn, Bewades BWT, Wyckomar, Aquafine, Sanitron and more.

Aquafides

UV-Guard is an Australia and New Zealand distributor of Aquafides validated UV systems. These units have been validated according

to European validation protocols – DVGW in Germany and ÖNORM M5873-1C in Austria.

Filtration Equipment

UV-Guard is an Australia and New Zealand distributor of the world's most innovative filtration products. This allows UV-Guard to combine UV disinfection with the required pre-treatment, creating wholistic water treatment solutions from source to application.

ZED Ziegler Electronic Devices GmbH

ZED are a supplier to UV-Guard of next generation accessories for UV systems including UV intensity monitoring equipment, sensors and more.

Other partnerships

UV-Guard's reputation in the industry has allowed us to develop key relationships with international UV companies. This means that we can also offer EPA validated UV systems from Hanovia, Berson, atg and more.
